

DeskPro 403 | 413 | 423 | 433

- Upgradeable speeds from 90ppm to 170ppm at 300dpi color / bitonal
- 24/7 duty cycle/no volume limits
- Glassless paper guides and paper path
- Maintenance free belt-drive paper transport
- Real time image processing and patchcode reader onboard
- Dual imprint and batestamp technology

Top Quality Engineering With The Lowest Cost Of Ownership

interScan's DeskPro series of high volume scanners are engineered and handcrafted in Germany, made exclusively for us by our partners at Inotec. The DeskPro series scanners offer world-class technology to provide the highest image quality and durability with the lowest total cost of ownership. DeskPro production scanners open a new dimension in document capture. Utilizing new and innovative technology, it has increased product reliability and scanning throughput for even the most difficult of scanning projects.

The DeskPro offers an intuitive ergonomic design with a high-contrast touchscreen display that simplifies operation for optimal user experience and improved efficiency. Color and white calibration profiles, focused LED illumination, and 600 dpi optical resolution ensures the highest image quality. Perfect Document Technology allows for the best in blank page detection, full color spectrum drop out (ColErase), and automatic color detection.

Image enhancements and processing are handled by the scanner's own internal hardware; improving workflow productivity by eliminating the need for time consuming post processing on an external PC. The DeskPro series scanners have a newly designed feeder concept that ensures a wide variety of documents can be fed automatically through the scanner. Even the thinnest paper is transported through the scanner reliably ensuring minimum downtime due to misfeeds.

Virtually maintenance free and 100% operator maintained, the DeskPro brings unmatched durability with the lowest total cost of ownership. Glassless paper guides mean there is no scratching or breaking, no black stripes on the image, less cleaning and no need to worry if a staple or paperclip is scanned. With the maintenance-free belt-transport lasting the life of the scanner, the consumables are limited to only one set of rubber rollers for the input feeder.

Professional Production Scanners

For Your Mission Critical Working Environment.

interScan offers the most comprehensive and flexible service plan on the market. By partnering with ServRight, we are able to provide access to over 3,500 Field Service Technicians throughout the US and Canada with 35 direct Technicians in 30 major Metropolitan Areas. ServRight provides the industry's best nationwide service and support solutions to companies that value quality, speed, flexibility, and cost control. In addition, interScan offers our Reseller and BPO partners the ability to become Authorized Service Providers.

DeskPro Series Specifications

Optics / Onboard Image Enhancement	
Camera / Resolution	CCD linescan camera / 600 dpi optical resolution
Output Resolution	Full speed 150, 200, 300 dpi plus 400 and 600 dpi, dual or multi resolution possible
Output Compression	CCITT Group IV, JPEG or fullspeed uncompressed (RAW) output
Lighting System	Focusing white LED illumination unit
Bitonal / Binarization	coldapt™ – intelligent dynamic threshold- with interactive preview and optimization
Grey / Color Image	8 bit - 256 grey levels, 24 bit - 16.8 million colors (True Color)
Image Processing	Bicubic deskew, black border removal, content based rotation, Color Drop out, CCP (Color Calibration Program), colerace™ – Digital Color Filter
Document Processing	
Document Input	Auto feed from stack or single sheet feed (hand feed), integrated support for long documents (input hopper plate extension)
Paper Stack	Up to 500 sheets, 12.5 inch width up 325 inch length
Formats & Weight	US sizes: Ledger, Legal, Letter, Executive, Invoice – 30 to 280 gm
Feed process control	Mechanical sheet separation and double feed control via three ultrasound sensor (can be independently programmed)
Scan area	Glassless with black scan or white background
Imprinter	Intelligent front- and backside Imprinter, front- and backside Bate stamp
Daily duty cycle	Unlimited 24/7 Production, 25Mil Pages Endurance
Interfaces	
Operation	Programmable Touchscreen and Foot pedal
Drivers	ISIS™, TWAIN, WIA, Kofax VRS
OS Support	Windows XP, Windows Vista, Windows 7,8,8.1,10 each 32 or 64bit
PC connection	Gigabit Ethernet, USB 3 High Speed Adapter
Technical Data	
Power consumption	115/240V Operating 80-160 W, sleep mode < 3.5 W, standby < 0.5 Watt
Environment	Temperature: 50 - 95°F/ Relative Humidity: 30 - 80%
Dimensions / Weight	width: 20 inch / height: 14 3/8 inch / depth: 25 19/32 inch / weight: 86 lbs
Noise emission	operating: < 64 dB (A), standby: < 41 dB (A)

interScan actively partners with leading software and technology companies to offer the best solutions to our customers. We are dedicated to the channel and only sell our Professional Production Scanners through Authorized Resellers. To find a Reseller or BPO near you, or to become a partner please contact sales at sales@interscanllc.com or call 1-888-980-9145
